CycleNetXChange

Schema

To use the CycleNetXChange schemas in your applications, you may either reference the appropriate URL for a particular version of the schema, or use a local copy of the schema files and directories for that version held on your own machine. This page provides the information you need to reference or download different versions of the schemas. Further information on the substructure of the schemas is given in the CycleNetXChange Specification.

Note that CycleNetXChange uses a systematic versioning scheme in line with e-Gif standards.
